

# QUALITY WOOD & METAL CASKETS

The casket is often the visual and emotional focal point of the ceremony. When selecting a casket, the first decision is typically the material it's manufactured from – wood or metal. Wood caskets have a natural warmth and beauty, resemble fine furniture, and are hand crafted from a renewable resource. Metal caskets have a wider range of choices in color and paint finishes, which in addition to the metal gauge (thickness), influence the cost. Below, we have shown just a sampling of the most popular selections. Complete price lists are available at our offices or online at: [www.MichiganCremation.com](http://www.MichiganCremation.com)
